

1. Getting Started with MATLAB
2. Environment and Settings
3. Language Fundamentals
 - a. Basic Commands
 - b. Data Types
 - c. Operators and Elementary Operations
 - d. Loops and Conditional Statements
 - e. Matrices and Arrays
4. Debugging and Testing
5. Mathematics
6. Graphics
 - a. 2-D and 3-D Plots
 - b. Formatting and Annotation
 - c. Images
 - d. Printing and Saving
7. Programming
 - a. Scripts
 - b. Functions
 - c. Classes
 - d. Files and Folders
8. GUI – GUIDE
9. Data Import and Analysis
 - a. Data Import and Export
 - b. Large Files and Big Data
10. External Language Interfaces
11. Getting Started with Simulink
12. Applications
13. Simulink Environment Fundamentals
14. Modeling
15. Simulation
16. Block Authoring and Simulation Integration
17. Supported Hardware
